Jamo A345 I/O

The Jamo A 345 I/O is the perfect choice for installing high-quality sound in homes or in commercial environments, indoors or outside.

Although these satellite speakers are relatively small, they feature a highly compact, two-way medium-sized bass-reflex configuration. A 4" woofer and a 1" tweeter offer superior sound quality and high power-handling.

Mount the speaker on the wall with the ingenious fittings supplied, or on a dedicated table stand; it's your choice, as both are included in the package with the speaker.

Alternatively, you can mount the speaker on the optional Jamo A 340 FS floor stand.
