## Beta® 27 Supercardioid Condenser Microphone

### Overview

The Beta 27 side-address condenser microphone is precision engineered for professional sound reinforcement and project studio recording applications. Its flat frequency response and low self noise provide unerring performance in demanding environments. A tight supercardioid pattern insures high gain-before-feedback and maximum isolation from other sound sources.

### Features

- Supercardioid polar pattern specifically targets the sound source consistently with greatly minimized bleed from off-axis sound sources
- Tailored for superior transient response from a low-mass, 1" externally-biased, ultra-thin 24 Karat gold-layered Mylar® diaphragm.
- Flat, neutral frequency response for natural reproduction on stage or in the studio
- 3-position switchable low-frequency filter helps reduce unwanted background noise or counteract proximity effect for consistent, extended low-end
- -15 dB switchable attenuator handles extremely high SPLs with ease
- Premium electronic components and gold-plated internal and external connectors
- Internal pop filter with three separate mesh layers reduces wind and breath noise.
