HERCULES[®]

STANDS

GUITAR STANDS

HERCULES designed the Auto Grip System in response to complaints that expensive instruments fall off their stands and break at the headstock. With the unique locking system, HERCULES guitar stands can withstand the rigors of the stage and the road.

Ever knock a guitar off the stand? Worried unsafe stand may damage your beloved instrument?

Our patented Auto Grip System (AGS) is engineered to function easily and is built to last. Specially Formulated Foam (SFF) rubber is widely used on all contact points between stand and your guitar.

Auto Grip System (Patented)

The ORIGINAL and still the BEST Auto Grip System (AGS) is driven by the weight of Guitar or Bass.

The AGS has been engineered with a smooth-sliding channel, main body and two arms with SFF rubber.

When the instrument is placed on the yoke, the channel slides down and rotates two arms holding and protecting your guitar.

To take the guitar, simply lift the instrument out of the housing, two arms release immediately. Fits guitars with neck from 40mm (1.58") to 48mm (1.89") wide.

Lift up the AGS yoke and the sleeve automatically locks into place.

Pull out the sleeve and fold down to pack.

The back rest with SFF rubber is designed to flip up for packing and change of position. (Patented)

GS523B 3+3=6 Guitars
GS525B 5+5=10 Guitars

Our goal at HERCULES is to build the best possible instrument stands. While our stands are intended to give you years of trouble-free use, all guitar manufacturers don't employ the same types of finishes or finishing techniques. Therefore, you must refer to the instrument manufacturer's owner's manual for information regarding the proper storage for your instrument.
