

# LISTEN WIRELESS®

## Product Data Sheet

The Listen range of headphones is expanding with Listen Wireless®. It combines all the advantages of premium headphones with those of wireless *Bluetooth*® technology. Excellent noise isolation is guaranteed thanks to the closed-back design and to the large ear cushions which preserve the headphones' acoustic qualities, even in noisy environments. The heat-sensitive, very high-density memory foam offers impressive comfort for the listener. Listen Wireless® also has excellent dynamics, tight bass and remarkable tonal balance. Its wireless technology offers long-range reception while ensuring very long autonomy. Listen Wireless® are premium headphones which are free from the constraints of traditional headphones, for even more freedom listening to high-definition sound.

### Key points

- Portable headphones, light, comfortable, excellent isolation
