Phantom

Specifications—Phantom

. Phantom video projector lifts. Select from (Model A/Model B). Electrically operated by a precision linear 24V DC linear actuator, power supply included. Double-pole, double-throw wall switch is standard, other control options available. The projector is mounted into a framework recessed above the ceiling. When activated, a trapdoor lowers the projector into the room. Factory set limit switches automatically stop travel at open and closed positions. Ceiling Panel finished white. Universal Projector Mounting Plate suits most projectors. Suitable for projectors up to 26 lbs. Tilt, Yaw and Pan adjustments available. Projector sits flush with ceiling (up to 10° downward tilt depending on projector). Maximum projector width is 13" for Model A, 167/8" for Model B.

Options (select as needed):

Ceiling access door provides ceiling access when unit is installed above hard ceiling and access to projector is not convenient.

Please Note: The Phantom should be specified in conjunction with a Draper video format motorized screen.

Phantom—Dimensions

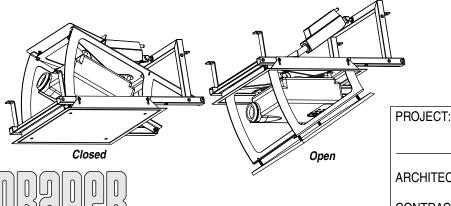

* Room for cable inputs must be considered along with projector width or length.

Find the point on the grid where the projector length and projector height intersect. If intersection point falls within shaded areas then it is compatible with that size Phantom. In addition, ensure projector is within width guidelines listed in the chart at left.

- A projector will fit into the Phantom Model A if its dimensions are in the darkest area. Maximum projector width=13'
- A projector will fit into the Phantom Model B if its dimensions are in the lightest shaded area. Maximum projector width=167/81
