## Audio Solutions

Vaddio's Family of EasyUSB and TRIO Audio Products  
Professional, broadcast-quality, in-room audio solutions

Vaddio's suite of audio devices bring a fresh, new and unique approach to audio.

**Truly professional audio**  
for easy programming and integration

Vaddio's EasyUSB is a suite of professional audio components that allow integrators the ability to get professional-grade audio performance from their computers.

## TRIO Audio Solutions

Vaddio's professional line of audio products with integrated SmartMIC technology.

Use proven Vaddio line of SmartMIC products with existing sound systems. The TRIO MIC I/O and TRIO Ceiling & Table Mics allow them to adapt to Vaddio's unique SmartMIC wiring, connectors and plug & play routing for use with traditional audio mixers. This device provides four modular SmartMIC inputs and four corresponding balanced 3-pin outputs. The microphone processing, including acoustic echo-cancellation is 'in the box'.

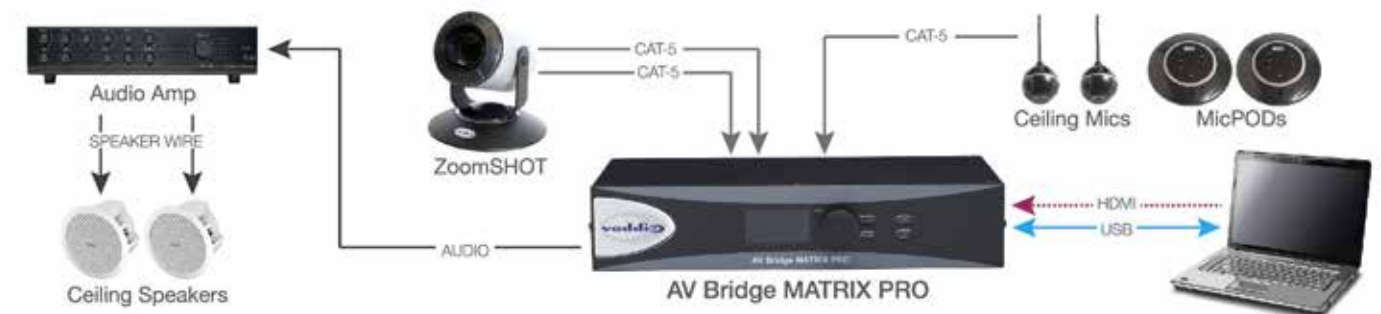

TRIO MIC I/O

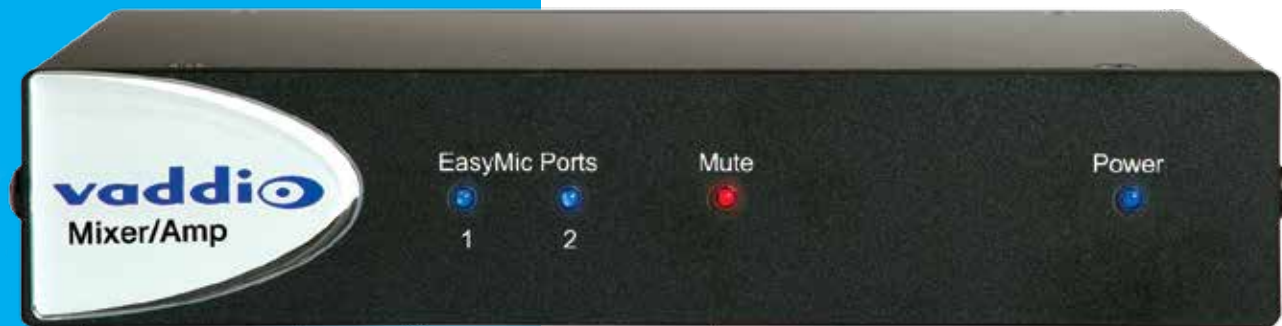

TRIO Table Mic

TRIO Ceiling Mic

## EasyUSB Mixer/Amp

**The ultimate method of achieving high-end, UC conference audio without the complexity and expense of an integrated system.**

The Vaddio Mixer/Amp and MicPODs allow the connection of one or two world-class, smart microphones to any computer using a simple USB 2.0 connection. Vaddio has simplified all of the connections for audio, power and processing into a simple plug and play package. A terrific example of Vaddio's forward thinking engineering, Vaddio's Mixer/Amp provides SmartMIC technology, amplified loudspeaker connections, auxiliary input & output and, of course, simple USB connectivity for use with nearly any PC conferencing application.

## MicPODs

**Echo-cancelling table or ceiling microphone pod providing a 360° pickup pattern.**

EasyUSB Table or Ceiling MicPOD microphones deliver professional audio quality into your PC system. Each MicPOD delivers the performance of three microphones built into an elegant tabletop or pendant hanging enclosure.

## PRO MIC I/O

**Provides inputs for standard, 3-pin professional microphones to connect to Vaddio's USB audio interfaces.**

Compatibility with traditional devices is essential so that tried & true components can be used when they're needed. The PRO MIC I/O provides professional mic inputs and outputs to the Mixer/Amp or the AV Bridge MATRIX PRO using our modular CAT-5 protocol. All of the microphone processing, is built into the PRO MIC I/O.

Vaddio's TRIO professional line of audio products with integrated SmartMIC technology allows echo cancellation to be added to any professional audio mixer for conferencing.

## ConferencePOD

**Designed to bring rich, intelligible audio performance to group audio conferencing applications.**

This simple and intuitive USB speakerphone device raises the bar for performance with a large-format, high-output loudspeaker and four acoustic echo-cancelled microphones for clarity at both ends of the conversation. A simple USB 2.0 cable is all that's needed to interface with any telephony application. Connect with Bluetooth and use the ConferencePOD with your cellphone or tablet.

## AudioBridge

**The AudioBridge will allow you to connect any existing audio system to your PC using a simple USB cable.**

The AudioBridge is equipped with professional-quality balanced and unbalanced inputs & outputs to connect to any audio source. There is also an RS-232 port so you can control audio levels, mute audio and answer calls with 3rd party control systems. The AudioBridge is the perfect companion to Vaddio's USB camera systems!
